Why Choose this Training Course?

The effective management of budgets and operational cost is a key aspect in leading and managing organizations. Nowadays, if contemporary organizations want to stay competitive, they are urged to think, plan and act in terms of value added to customers and shareholders. Along this line, budgeting, as well as tracking, controlling & reducing cost represent essential activities to be performed and monitored as strategies get executed.

In addressing these issues, this course is relevant for those professionals and analysts facing the difficult challenge of improving performance while reducing costs of those processes for which there are accountable.

This course will feature:

- The management system in practice;
- Budgeting practices;
- Traditional and innovative tools for budgeting and cost control;
- Multiple cost analysis for different purposes;
- KPIs and the Balanced Scorecard.

What are the Goals?

By the end of this course, participants will be able to:

- Master the budgeting process
- Understand costs behavior
- Explore traditional & innovative approaches to Budgeting & Cost Control
- Analyze process costing
- Manage balanced scorecard

Who is this Training Course for?

This course is suitable to a wide range of professionals but will greatly benefit those with direct or indirect budget responsibilities within a Team, Department or Division. Moreover, the course is suitable to first appointment professionals on fast-track development programs, and to professionals from every business

discipline and department who have to run budgetary plans, and who are responsible for cost and strategic analysis, including:

- Financial Planning & Control Staff
- Those with direct or indirect financial responsibilities
- Those from every business discipline and department who have to run departments and budgetary plans, and who are responsible for cost and strategic analysis
- Those from all sectors of industry, irrespective of functional responsibilities, but particularly those involved in manufacturing, production, engineering or sales
- Those working in a project management environment

How will this Training Course be Presented?

The course combines theory and practice. Therefore, besides in-class lectures, discussions and exercises, we use company examples to illustrate how the techniques presented have been applied in real case studies. The purpose is to use a mix of proven learning techniques to ensure maximum understanding, comprehension and retention of the information presented.

The Course Content
