

Testing, Maintenance & Operation of Electrical Substations

التاريخ	الرسوم (\$)	سجل الآن
٢٦ مايو - ٣٠ مايو ٢٠٢٤	٥٥٠٠	لندن - المملكة المتحدة

Course Overview

This course is aimed at introducing the power-substation layout and design to utility and industrial engineers. The course will cover substation layout, design, grounding and

protection. The course will be supported by practical design examples

Course Objective

To improve the skills of engineers involved in design, operation and maintenance of electric power substation. A degree in electrical engineering is recommended to gain maximum benefit from the course

Who Should Attend

Engineers involved in design, operation and maintenance of power substations. A degree in electrical engineering is recommended to gain maximum benefit
